The following action is in response to the amendment received December 21, 2005.

***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

**In claim 2, line 2, after "through", "the" has been deleted.**

**In claim 2, line 3, "a slip clutch " has been changed to – the slip clutch --.**

**In claim 2, line 8, after "opposite", -- the – has been inserted.**

**In claim 2, line 15, "a series" has been changed to – the series --.**

**In claim 2, line 15, "the switch" has been changed to – the reed switch sensor --.**

The above changes have been made to clarify antecedent basis for various terms in the claim.

***Allowable Subject Matter***

Claims 1 and 2 are allowed.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to show or render obvious an over-running clutch in the combination recited in claim 1 including the claimed sensor, magnetic actuator, and shield as defined in the claim, and particularly wherein the shield is disposed for shielding the sensor from the magnetic actuator when the input and the output are jointly rotating and allowing the sensor to be sufficiently exposed to the magnetic field to change the state of the sensor when the input and output are overrunning.

The art of record also fails to show or teach the combination defined in claim 2 including a reed switch sensor, a magnetic actuator, and shield assembly wherein the shield assembly blocks the magnetic field between the reed switch sensor and the actuator until the clutch slips, the shield having a series of openings such when the clutch faults the shield assembly rotates to a position exposing the actuator and the sensor through the openings thereby changing the state of the reed switch sensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Amendment***

Applicants' amendment to the specification filed December 21, 2005 overcomes the objection to the drawings set forth in the previous Office action. Accordingly, the objection is withdrawn.

The amendment filed December 21, 2005 corrects some of the antecedent problems in claims 1 and 2. Certain other ambiguities concerning antecedent basis have been corrected by the examiner's amendment above, e.g., that "a slip clutch" in line 3 of claim 2 refers to the slip clutch defined in line 2. Accordingly, the rejection under 35 USC 112, second paragraph, set forth in the previous Office action is withdrawn.

Applicants' arguments (pages 5-7 of the response filed December 21, 2005) regarding the rejection of claims 1 and 2 under 35 USC 103(a) have been considered and are persuasive. Therefore, the rejection of claims 1 and 2 under 35 USC 103(a) is withdrawn, and the claims are allowed for the reasons set forth above under "Reasons for Allowance".
